# Vertical Sliders

A revolutionary PVC-U sliding sash window designed to recreate the timeless elegance of timber.

## Modern technology meets traditional craftsmanship

Perfect for period properties or contemporary buildings, we combine traditional styling with modern technology for the ultimate in performance.

When we think of classic sliding sash windows we often think of wood. But while new wooden windows can look stunning, after several months they'll need expensive, time-consuming maintenance to keep them looking as good. Add to that the initial high cost of timber and there's only one solution...

Less costly than timber, they retain all the period charm of its timber ancestor but with all the benefits that a modern window has to offer. So, why would you choose wood when you can have the Heritage?

### The Chatsworth Heritage

The Vertical Slider from Chatsworth is a unique window that really does hit the spot when it comes to traditional appearance. The unique joint design to both sash and outer frame replicates a traditionally made timber window for a truly authentic appearance, setting your windows apart from the rest. Combined with period hardware and a complete range of heritage finishes, the Heritage VS pushes the boundaries of modern PVC-U sliding sash windows. Performance, style and elegance are all at the forefront with this period-feel window.

### Traditional

The Heritage Slider recreates the beautiful styling of a traditional timber sliding sash window like no other. With its authentically jointed frame and sash it replicates the windows of yesteryear that are found in period cottages and older properties. In days-gone-by, the only option was timber. With the advent of Heritage, the modern vertical slider draws strongly on its traditional roots and puts all of its competitors in the shade. Modern PVC-U and glazing technologies offer the ultimate in comfort whilst still retaining period style.

### Modern

With its elegant styling and precision design, the Heritage sliding sash will enhance any modern home as well as a traditional property. Designed for modern living, We combine cutting edge technology with the traditional character of a box sash window. Precision-engineered for smooth, simple operation, They effortlessly complements your modern lifestyle.

- ✓ Authentically jointed frame and sash, lending a traditional feel to modern window technology
- ✓ Up to WER 'A' rating yet still retaining time-honoured grandeur and appearance
- ✓ Complete range of authentic woodgrain and heritage coloured foil options
- ✓ Matching Georgian/Astragal bar to enhance the traditional styling
- ✓ Deep bottom sash rail as standard for true authenticity
- ✓ No glass bonding required with the unique milled sash design

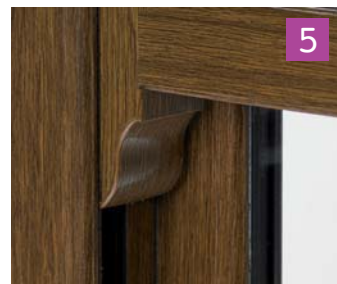

Whether you are retaining the elegance of an older property or injecting a period feel into a new-build, the Heritage VS seamlessly combines an authentic 'hand-crafted' appearance with all the comforts of a state of the art window giving you the best of both worlds.

We also offer bays and bows on a single cill, precoupled and with traditional appearance bay posts.

- ✓ Systems designed to achieve a Window Energy Rating of Band A
- ✓ Fully committed to ISO 14001 standards covering all environmental issues
- ✓ Frames can be customised to meet the highest security standards

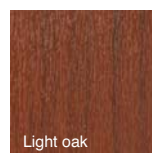

# In full colour

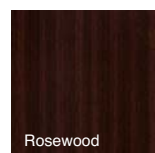

It is all about taking something great... and making it even better. And our range of stunning colours and beautiful woodgrain foiled finishes do just that.

As there's nothing standard about our window, there's also nothing standard about our colours and finishes either. You'll notice that the colours in our palette have been carefully selected to replicate the colours that were traditionally used to paint sliding sash windows. You can even choose different colours on the outside and inside to complement your interior décor.

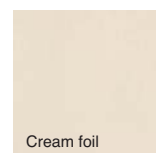

Unlike paint, our foiled finishes are highly durable and won't peel, fade or crack over time, so your windows will look as stunning in years to come as they do the day they're installed.

Light oak

Rosewood

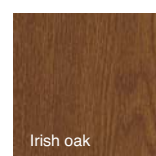

Cream foil

White foil

Chartwell  
green

Irish oak

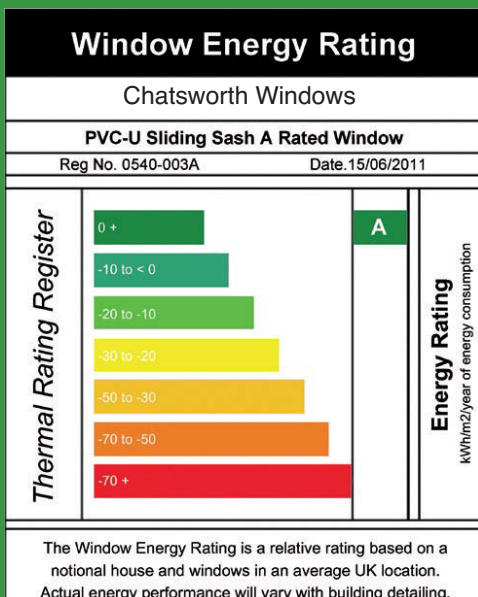

Full range of woodgrain and heritage finishes available.

# Environmental policies

## Energy Saving... ...an issue that effects us all

About 20% of heat is lost through poorly insulated window frames and single glazed windows, which not only is a burden on your heating costs but also on our planet, an issue which we take very seriously.

When you choose windows from Chatsworth Windows you can select a product with high energy efficiency, benefiting you not only from an energy saving cost point of view but also by helping to protect and preserve our environment.

Window Energy Ratings use a consumer-friendly traffic-light style A-E ratings guide similar to that used on 'white' goods (such as fridges, freezers, washing machines etc). This ratings label can be used by you to make more informed choices about the energy efficiency of the windows you are looking to purchase.

**Each window rated by BSI has a unique label**  
**This label will display the following information:**

- 1 The rating level – A, B, C, etc...
- 2 The energy rating eg. -19kWh/(m<sup>2</sup>K) in this example the product will lose 19 kilowatt hours per square metre per year.
- 3 The window U value eg. 1.5W/(m<sup>2</sup>K)
- 4 The effective heat loss due to air penetration as L eg. 0.01 W/(m<sup>2</sup>K)
- 5 The solar heat gain eg. g=0.40
